Eco-Products PLA Corn Cups™

PLA Cup - Green Stripe

Our compostable/biodegradable cups are clear and are made from an annually renewable resource – corn! With the same look and feel as clear plastic cups, our compostable biodegradable Corn Cups™ contain NatureWorks® Biopolymer, an environmentally friendly alternative to plastic. The cups are odorless, completely non-allergenic and biodegradable. These products are designed to compost in a commercial facility in 45-60 days. Custom printing is available for all customers with minimum order: 30 cases per size.

Item #	Product Description	Case Count	Case Weight	Case/Pallet	Cost

Eco-Products Eco Hot Cups

Eco-Products Eco Hot Cups are lined with a vegetable-based coating rather than traditional poly-lining. This lining allows the cups to be 100% biodegradable and compostable. Eco-Products performs ample testing to ensure the products do not leak, and offers custom-printing with 200 case/size minimum run.

Eco-Products Sugarcane Clamshells & Boxes

6x6 Cl 6x6 Clamshell

9x9 Clamshell

2-Compartment Clamshell

Sugarcane is an annually renewable resource and these products are created from the waste product of the cane sugar industry. After the cane juice is extracted from the plant, the stalk is ground up and made into paper pulp. This paper pulp is then made into a variety of sturdy products, including clamshells and take-out boxes. These products are designed to compost in a commercial facility in 45-60 days.

Item #	Product Description	Case Count	Case Weight	Case/ Pallet	Cost
EP-HC6	6"x6"x3" Clamshell	500	27	42	\$56.03

Eco Soup Cups & Souffle Cups

Compostable Eco Soup Cups

Souffle Cups

Eco-Products soup cups are perfect for holding hot soup or liquids for long time periods. They're lined with a vegetable-based coating to prevent liquid from absorbing into the cup. They're certified 100% biodegradable & compostable, are FDA approved and compost in 60 days in a commercial composting situation. And the world-art print displays the environmental benefits!

Our compostable/biodegradable souffle cups are clear and are made from an annually renewable resource – corn! With the same look and feel as plastic souffle cups, our compostable biodegradable souffle cups contain NatureWorks® Biopolymer, an environmentally friendly alternative to plastic.

Compostable Straws & Accessories

Eco-Grip

PLA Straws

Our straws are made from 100% PLA corn plastic. They are 100% compostable and biodegradable and can be purchased in three sizes, wrapped or unwrapped. They are strong and sturdy, but are only for cold beverages.

Our EcoGrips are made from up to 95% recycled paper and have superior insulating properties. The EcoGrips are also unbleached. They are available in Kraft and can be custom printed with a minimum order of 40 cases. Paper makes up over 40% of our nations landfills. Not only is it important to recycle, but also to buy recycled products to complete the loop!

PLA Corn Plastic Hinged Clamshell & Black Bottom Food Containers

8" Clamshell

Black Bottom Food Container

8" 3 compartment Clamshell

6" Clamshell

We carry a full line of biodegradable food containers made from corn. These containers are made from NatureWorks® Biopolymer, a 100% corn-based resin that is fully compostable. Our Black Bottom Food Container has a black bottom and clear top. The bottom is made black by using soy ink and maintains its compostability. These containers are for cold and warm foods only and cannot be exposed to heat over 130 degrees. These products are designed to compost in a commercial facility in 45-60 days.

BioBags

BioBags

Kitchen Composter

Eco-Products is proud to be carrying the best selling brand of certified 100% biodegradable and 100% compostable bags made from the material, Mater-Bi. Bio-Bags are the first "bag from corn" to achieve national distribution of retail products through natural food stores across the country. If placed in a composting facility, they will completely biodegrade in as little as 45 days.
